Hi Andy,

I inspected this property per SITLA's request after the lease cancellation. I was out there last July and confirmed that the operator never conducted any mining at the site. The operator is applying for the full bond release, which I am processing right now.

I did want to make you aware of some minor amounts of trash on the property. If you look at the photos from the inspection there is an oil can and a measuring stick in the ground. I don't know how you guys handle this sort of stuff after the lease expires, but nevertheless, I wanted to make you aware of it.

Let me know if you have any questions or concerns about the bond release. Thanks!

April
